

Multi-projector Auto-Calibration with semi-elliptical screen

Setup relies on:

- 1 x [Modulo Kinetic Designer](#)
- 2 x Modulo Kinetic V-Node servers with 6 outputs each
- 2 x dongles with [Auto-Calibration option](#) for 6 outputs
- 1 x PoE camera (not-included)

User-friendly and flexible Management:

Powerful workstation: Modulo Kinetic Designer
 Quick and easy auto-calibration thanks to dedicated wizzard embedded in Modulo Kinetic Designer

Powerful Auto-Calibration module:

Multi-projector automatic edge blending and warping for planar, curved, and dome surfaces
 Fully scalable with unlimited number of Modulo Kinetic servers supported
 Support of independent calibration groups and stacked projectors
 Masking features for a perfectly fine-tuned projection
 Zero latency
 Designed for steady and reliable 24/7 operation
