

## Multi-projector Auto-Calibration with semi-elliptical screen

### Setup relies on:

- 1 x [Modulo Kinetic Designer](#)
- 2 x Modulo Kinetic V-Node servers with 6 outputs each
- 2 x dongles with [Auto-Calibration option](#) for 6 outputs
- 1 x PoE camera (not-included)

### User-friendly and flexible Management:

Powerful workstation: Modulo Kinetic Designer  
Quick and easy auto-calibration thanks to dedicated wizard embedded in Modulo Kinetic Designer

### Powerful Auto-Calibration module:

Multi-projector automatic edge blending and warping for planar, curved, and dome surfaces  
Fully scalable with unlimited number of Modulo Kinetic servers supported  
Support of independent calibration groups and stacked projectors  
Masking features for a perfectly fine-tuned projection  
Zero latency  
Designed for steady and reliable 24/7 operation
