# Interactive projection & mapping configuration

**Setup relies on:**
1 x Modulo Kinetic Designer
1 x Modulo Kinetic V-Node server with 1 output

**Versatile Display capabilities:**
Video mapping with 2D and/or 3D warping tools
Powerful audio, image, and video playback
Designed for steady and reliable 24/7 operation

**Advanced user-friendly Interactivity:**
Trigger tasks and interact with media, light and audio of your show from web application on phones, touch screens, or any other computing device via two possible methods:
1. Custom panels created using our embedded UI Designer and Kinetic panel application
2. Custom web applications through the support of the WebSocket protocol

OUTPUT #1

Modulo Kinetic V-Node          Modulo Kinetic Designer

Ethernet switch     ETHERNET
