

3D Auto-Calibration on a building

Setup relies on:

- 1 x [Modulo Kinetic Designer](#)
- 2 x [Modulo Kinetic V-Node servers](#) with 4 outputs each
- 2 x dongles with [Auto-Calibration option](#) for 4 outputs
- 6 x PoE cameras (not-included)

User-friendly and flexible Management:

Powerful workstation: Modulo Kinetic Designer
 Quick and easy 3D auto-calibration thanks to dedicated wizzard embedded in Modulo Kinetic Designer

Powerful 3D Auto-Calibration module:

- Multi-projector automatic edge blending and warping
- Fully scalable with unlimited number of Modulo Kinetic servers supported
- Support of independent calibration groups and stacked projectors
- Masking features for a perfectly fine-tuned projection
- Zero latency
- Designed for steady and reliable 24/7 operation
